## **Introduction**

### **Physician Assistant Education Association**

Founded in 1972, the Physician Assistant Education Association (PAEA), formerly known as the Association of Physician Assistant Programs (APAP), is the only national organization representing physician assistant (PA) educational programs in the United States. As of December 2012, PAEA represented 168 member programs; historically, all accredited programs have elected to join the Association. The Association provides a number of benefits to faculty at member programs, including the Annual Education Forum, a quarterly peer-reviewed journal, a newsletter blog, faculty and program directories, the PACKRAT student assessment exam, End of Rotation (EOR) Exams, and this report. The Association also provides services to students and applicants, including the Physician Assistant Programs Directory and the Central Application Service for Physician Assistants (CASPA).

### The Annual Report

The process of establishing a national database on PA programs was initiated in 1984 by Denis Oliver, PhD. The first national survey requested information about a variety of program characteristics, including institutional sponsorship, financial support, program personnel (faculty and support staff), characteristics of applicants and matriculants, curriculum, student attrition, and graduate employment characteristics. The findings from the 1984 survey were published as the *First Annual Report on Physician Assistant Educational Programs in the United States*, 1984–1985, and to date, a total of 27 annual reports have been published, including the present report.

Dr. Oliver retired as author after publication of the 11<sup>th</sup> Annual Report. Between 1995 and 2007, the survey was conducted and the report authored by Albert Simon and Marie Link from the Saint Francis University Department of Physician Assistant Sciences. In 2008, PAEA brought the project in house and revamped the process, including revisions to the program survey, development of an online survey portal to facilitate the programs' submission of data, and report redesign. This is the last year that the Annual Report will be available in print. The report will be available only online in subsequent years.

Response rates typically have been over 80%. This response rate makes the findings likely to be representative of the PA educational programs in the United States. In an effort to achieve a 100% response rate, PAEA continues to pursue efforts to improve program compliance with its membership requirement to complete the survey. The basic elements of the survey have remained consistent over its 27-year history, which has allowed the Association to detect trends and document changes over time. For this report, the overall response rate for PA programs was 100%; however, the response rate for some items is lower.

## **Methods**

Surveys were delivered via email links to all member PA program directors.

### The Survey Instrument

The survey consisted of six sections:

- **1. General Information:** Includes geographic location of programs, Carnegie classification of sponsoring institutions, credentials awarded, year first class enrolled, program length, and program start and end months.
- **2. Financial Information:** Includes program budget sources, expense areas, tuition and fees, incidental costs for students, and financial aid information.
- **3. Program Personnel:** Includes student/faculty ratio, demographic characteristics of faculty and staff, professional characteristics of faculty and staff, salaries of faculty and staff, clinical work, turnover, tenure tracks available at sponsoring institutions, and barriers to hiring new faculty.
- **4. Application and Admissions:** Includes recruiting strategies, entry degree requirements, prerequisite courses, health care experience requirements, and interview requirements.
- **5. Matriculants:** Includes demographic and academic information about enrolled students.
- **6. Class Profiles and Graduates:** Includes information on student graduation, attrition and deceleration, characteristics of recent graduates, and starting salaries for recent graduates.

### **Survey Period and Coverage**

All sections of the survey cover the 2010-2011 academic year, except those relating to financial information. The financial information is based on the 2010-2011 fiscal year, as defined by each program.

Unless otherwise indicated, the survey covers the professional phase of the program. "Professional phase" is defined as that portion of a PA student's education that is conducted in an educational program accredited by the ARC-PA; this is typically about two years in length (one year of classroom and laboratory instruction followed by one year of clinical rotations). Students in "pre-PA programs" or the first two years of 2+2 or similar programs were not considered to be in the professional phase.

## **Response Rate**

The online survey was sent to 159 member programs in June 2011. Of the 159 programs, 154 were PAEA members and five had pending memberships. Phone and email reminders were sent to non-respondents. The survey data used in this report were downloaded in March 2012. The survey yielded an overall response rate of 100% based on the 159 respondents; however, the response rate for some items is lower. After the survey was conducted, nine new programs were accredited and joined PAEA as of December 2012. General information for all 168 member programs was included whenever possible.

### **Data Editing and Analysis**

Responses to multiple-choice questions were checked for logistical consistency. Responses were examined for extreme values and possible errors. In cases of obvious misinterpretations or inconsistencies in the responses to specific items, respondents were contacted for clarification. Responses that fell outside of reasonable parameters were not included in this analysis. Tables and figures presented in this report represent aggregate data from the respondents. The number of responses to particular questionnaire items varied slightly. Data for the matriculant section of the survey were primarily obtained from reports generated through the Central Application Service for Physician Assistants (CASPA).

IHS Global Insight assisted with the analysis of data and creation of tables. IHS Global Insight consultants Timothy Dall and Michael Storm created preliminary tables for the entire report and provided final salary tables for publication. In general, analyses of the data consisted of producing descriptive statistics on the variables of interest (i.e., percentage, arithmetic mean, median, standard deviation (SD), range of values, and percentiles). Data were not reported when five or fewer values were represented in a category. In some cases, percentages presented in tables will not equal 100% due to rounding.

### **Corrections to the 26th Annual Report**

Please note the following corrections to the 26th Annual Report on Physician Assistant Educational Programs in the United States:

Page 14: On average, responding PA programs had 10.4 faculty members and 3.2 staff members.

**Page 30**: White students had a graduation rate of 93.3%, followed by Asian students (92.8%), and African American students (84.3%).

## **Acknowledgements**

Data and Research Subcommittee, PAEA

Crecilla Scott, former Director of Data and Research, PAEA

Rachel Hamann, Research Assistant, PAEA

Note: Although a significant portion of the work of the 27th Annual Report was contributed by those identified above, the final report was prepared by:

Lindsey Mayberry, Senior Research Analyst, PAEA

Anthony A. Miller, Senior Director, Education Policy and Strategy, PAEA

## **Definitions**

Academic health center: As defined by the Association of Academic Health Centers, an academic health center "consists of an allopathic or osteopathic medical school, one or more other health profession schools or programs (such as allied health, dentistry, graduate studies, nursing, pharmacy, public health, veterinary medicine), and one or more owned or affiliated teaching hospitals, health systems, or other organized health care services."

**Consortia:** The 50 states and the District of Columbia are divided into six consortia, as follows:

East: DC, DE, MD, PA

Heartland: KS, LA, NE, OK, TX

Midwest: IA, IL, IN, MI, MN, MO, ND, OH, SD, WI

Northeast: CT, MA, ME, NH, NJ, NY, RI, VT

Southeast: AL, AR, FL, GA, KY, MS, NC, SC, TN, VA, WV

West: AK, AZ, CA, CO, HI, ID, MT, NM, NV, OR, UT, WA, WY

**Core faculty:** The program director, the medical director, and all additional faculty, regardless of FTE (full-time equivalent), who are supervised by the program director.

**Decelerated students:** Students who do not advance to graduation with the same class they matriculated with.

Health care experience: Includes health care-related experience and direct patient contact experience.

Health care-related experience: Health care experience in which the student's primary responsibilities did not call for direct contact with patients but involved him or her indirectly in patient care (e.g., lab technician, front office worker, hospital personnel, research associate).

**Direct patient contact experience:** Health care experience in which the student's primary responsibilities called for direct patient contact (e.g., nurse, EMT, corpsman/medic, nurse's aide, medical assistant).

**Maximum capacity:** Maximum number of students that could potentially be enrolled in a program for each admission cycle.

**Professional phase:** Refers to only that portion of a PA student's education that is conducted in an educational program accredited by the ARC-PA; this is typically about two years in length (one year of classroom and laboratory instruction, followed by one year of clinical rotations). Students in "pre-PA programs" or the first two years of 2+2 or similar programs are not considered to be in the professional phase.

## **Additional Copies of this Report**

Telephone: (703) 548-5538

## **Section 1. General Information**

### **Geographic Location**

By December 2012, there were 168 PA member programs across the country. As shown in Figure 1, the states with the largest numbers of programs are New York (21 programs), Pennsylvania (18 programs), California (9 programs), and Florida (9 programs). Programs in those four states made up more than one-third of all programs (34%). This distribution of programs by consortium can be found in Table 1.

Figure 1. Geographic Distribution of PA Member Programs as of December 2012

**Table 1. Distribution of PA Member Programs** 

	ALL PR	OGRAMS	SURVEYED	PROGRAMS
Consortium	Number	Percent	Number	Percent
Southeast	37	22.0%	36	22.6%
Northeast	36	21.4%	33	20.8%
Midwest	32	19.0%	31	19.5%
West	23	13.7%	22	13.8%
East	23	13.7%	22	13.8%
Heartland	17	10.1%	15	9.4%
Total	168	100%	159	100%

## **Carnegie Classification of Sponsoring Institution**

Currently, approximately two out of three (65%) sponsoring institutions are private (see Table 2). The majority of the surveyed institutions were universities, whereas 4% were associate level colleges (classified in past reports as community colleges). Of the 156 programs that responded, 36.5% indicated that their sponsoring institution was an academic health center (AHC).

**Table 2. Carnegie Classification of PA Member Program Sponsoring Institutions** 

	ALL PROGRAMS		SURVEYED	PROGRAMS
	Number	Percent	Number	Percent
Private	109	64.9%	104	65.8%

Total	168	100%	159	100%

#### **Credentials Awarded**

The vast majority of PA programs (91%) offer a master's degree as the highest credential (see Table 3). Three programs offer a certificate. Figure 2 illustrates the rapid growth of master's level programs since 2000.

**Table 3. Highest Credential Awarded by PA Member Programs** 

	ALL PRO	OGRAMS	SURVEYED	PROGRAMS	
Credential	Number	Percent	Number	Percent	
Master's Degree	154	91.6%	144	91.1%	
Baccalaureate	10	6.0%	10	6.3%	
Certificate	3	1.8%	3	1.9%	
Associate's Degree	1	0.6%	1	0.6%	
Total	168	100%	158	100%	

Figure 2. Highest Credential Awarded by PA Member Programs 1997–2011

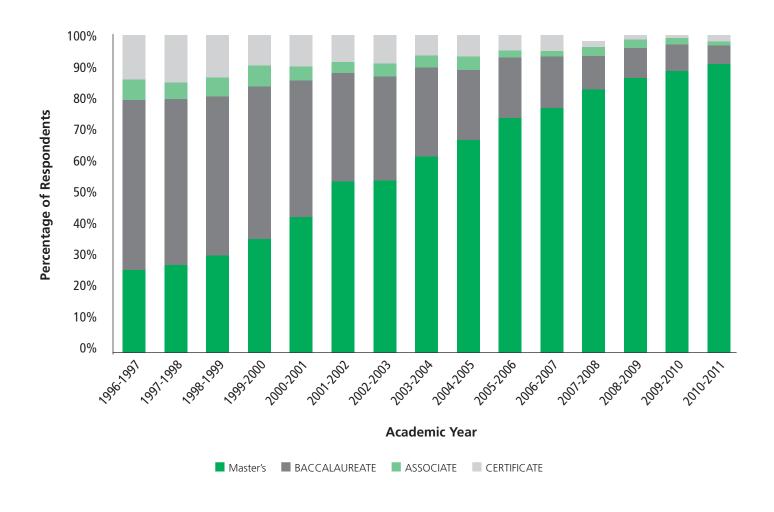

Table 4 illustrates the wide diversity of the types of degrees offered by physician assistant programs.

**Table 4. Credentials Awarded by PA Member Programs** 

Credential	Number of Programs	
Certificate	34	
Associate	5	
Baccalaureate		
Bachelor of Science (BS)	10	
Bachelor of Science in Physician Assistant (BSPA)/Bachelor of Science in Physician Assistant Studies(BSPAS)/Bachelor of Physician Assistant Studies (DPAS)/Bachelor of Physician Assistant (BPA)	8	
Bachelor of Medical Sciences (BMS)	0	
Bachelor of Clinical Health Services (BCHS)	1	
Bachelor of Health Science (BHS)/Bachelor of Science in Health Science (BSHS)	3	
Other Baccalaureate Degree	1	
Master's		
Master of Science (MS)	26	
Master of Physician Assistant Studies (MPAS)/Master of Science in Physician Assistant Studies (MSPAS)/Master of Physician Assistant Practice (MPAP)/Master of Physician Assistant (MPA)	83	
Master of Health Science (MHS)/Master of Science in Health Science (MSHS)	10	
Master of Medical Science (MMS/MMSc)/Master of Science in Medicine (MSM)	18	
Master of Public Health (MPH)	5	
Other Master's Degree	9	
Other Degrees	8	

Note: Some programs award more than one credential.

#### **Year First Class Enrolled**

Figure 3 shows the number of programs enrolling their first class in each academic school year since the first PA program enrolled students in the 1965-1966 academic school year. Following last year's report, one new program started their first class in the 2011-2012 academic school year, bringing the total to six programs. Additionally, two programs will start their first classes in the 2013-2014 academic school year.

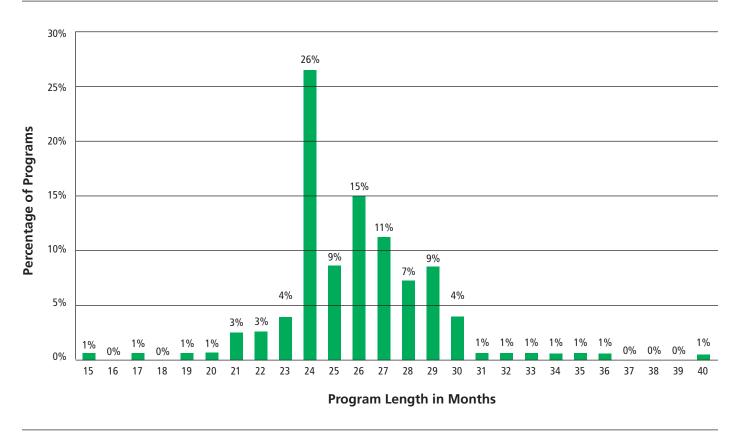

Figure 3. PA Programs by Year First Class Was Enrolled

Note: Accreditation cycle for 2013-2014 not complete.

### **Program Length**

Program length was measured for the entire length of most programs but only the professional phase for those that had a pre-professional curriculum. Figure 4 shows that the average program length was 26 months for all responding programs. Over three-quarters of the programs reported a program length between 24 and 29 months in the 2010-2011 academic year. The shortest program length was 15 months and the longest program was 40 months. The average length of the didactic phase was 53 weeks (SD = 10.1, median = 52) and the average length of the clinical phase was 52 weeks (SD = 9.5, median = 50). The average total program length was 112 weeks (SD = 15.8, median = 112), which includes vacation. As more programs are incorporating clinical training into the didactic phase, it becomes increasingly challenging to capture the exact length of time for each phase.

**Figure 4. PA Program Length (Months)** 

Note: Numbers are rounded to nearest percentage.

## **Program Start and End Months**

Table 5 shows that the most common start month for responding programs was August (31%). Eighty-six percent of responding programs started between May and September. The most common end months for responding programs were May, August, and December.

**Table 5. PA Program Start and End Months** 

	N	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sept	Oct	Nov	Dec
Start	157	12.1%	0.0%	0.6%	0.0%	18.5%	21.0%	5.7%	30.6%	10.2%	0.6%	0.6%	0.0%
End	157	0.6%	0.6%	1.9%	1.9%	24.8%	5.7%	7.0%	29.3%	2.5%	0.6%	0.6%	24.2%

## **Section 2. Financial Information**

For this section, programs were asked to supply their financial information for the most recent fiscal year. Other sections of this report requested information for the 2010-2011 academic year.

### **Budget**

Table 6 summarizes sources of financial support of responding programs. Only responses that included the actual amount of support were used in calculating budget statistics. Zero values were not included in the calculations. For this reason, mean percentages of budget items from all sources do not add up to 100%.

Budget information was provided by 138 programs. Most responding programs (86%) reported having received direct support from their sponsoring institutions. On average, direct support from the sponsoring institution made up 85% of the budget. Thirty-eight percent of responding programs collected tuition and fees directly, which accounted for 54% of their total budget amount.

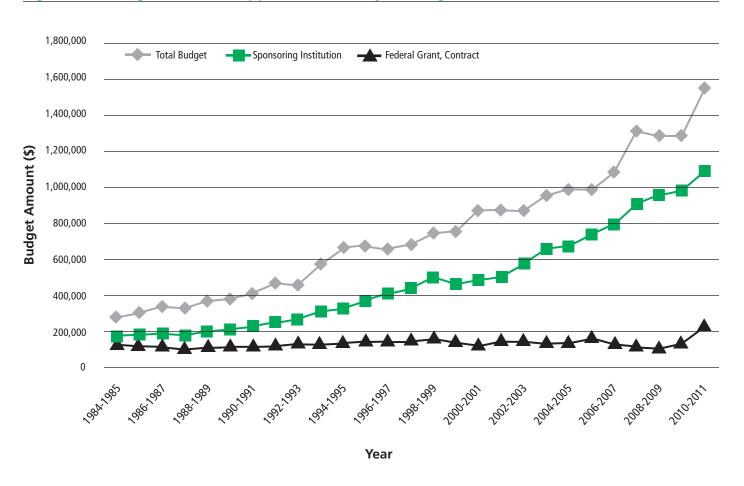

**Table 6. Sources of Financial Support for PA Programs** 

Budget Source	N	Mean	P10	P25	P50 (Median)	P75	P90	Mean % of Budget
All Sources	138	\$1,546,037	\$688,720	\$842,409	\$1,228,802	\$1,760,740	\$2,506,883	-
Sponsoring Institution	119	\$1,087,424	\$489,136	\$733,644	\$957,004	\$1,297,064	\$1,825,951	85%
Tuition and Fees	52	\$1,338,877	\$43,904	\$133,096	\$907,179	\$2,102,940	\$3,408,916	54%
Federal Grant/Contract	31	\$236,013	\$59,965	\$121,000	\$155,954	\$292,000	\$347,268	14%
State Grant/Contract	15	\$221,649	\$15,260	\$40,418	\$135,000	\$274,607	\$314,210	17%
AHEC Support	3	\$3,135	\$940	\$1,150	\$1,500	\$4,303	\$5,985	1%
Private Foundation	10	\$22,324	\$2,709	\$3,443	\$5,779	\$14,500	\$77,500	3%
Private Donation	19	\$28,979	\$900	\$1,900	\$5,000	\$28,682	\$97,088	13%
Other	18	\$159,813	\$7,633	\$19,044	\$62,003	\$244,072	\$423,246	11%

Note: Three programs claimed AHEC support and two claimed industry donation.

Figure 5 shows the trends in total financial support received by responding PA programs, support from the sponsoring institution, and support from federal grants or contracts (see Appendix II. Historical Tables: Table A. "Financial Support Received by PA Programs, 1984-2011"). Table A illustrates the annual variability in program budgets. The average support from the sponsoring institution increased 11.4%, and the average support from federal grants or contracts increased 64.2%. Twenty-three percent of responding programs reported receiving federal grants or contracts.

Figure 5. Average Financial Support Received by PA Programs, 1985–2011

### **Expenses**

Programs were asked to estimate the percentages of their total budgets accounted for by various items, such as employee salaries, instructional equipment, technology, faculty development, and support for faculty or student travel to clinical sites. Percentage totals may not add up to 100% as only major expenses were included. Missing values and zeros were not included in mean and median calculations.

Table 7 presents the mean, median, and percentage of program expenses by category. Faculty salaries comprise the largest share of the budget, 58.3%, which is a decrease from 66.2% the previous year. Most programs (97.1%) paid for faculty development. Precepting expenses decreased, with 21.1% of programs indicating them as part of their expenses. Other major expenses averaged 13.8% of PA programs' overall budgets and included insurance, rent, student scholarships, taxes, honoraria, and fringe benefits.

Table 7. Percentage Allocation of PA Program Expenses

Expense Items	Mean % of Budget	Median % of Budget	% Programs Paying for this Category
Faculty Salaries (including adjunct faculty)	58.3%	62.5%	96.4%
Staff Salaries	12.0%	10.0%	94.1%
Instructional Equipment (e.g., mannequins)	5.2%	3.5%	92.0%
Technology (e.g., computer software)	2.4%	1.0%	88.1%
Faculty Development (including conferences)	3.2%	2.0%	97.1%
Support for Faculty Travel to Clinical Sites	2.0%	1.0%	89.8%
Support for Student Travel for Clinical Training	0.5%	0.0%	19.8%
Precepting	1.9%	0.0%	21.1%
Student Housing	0.5%	0.0%	17.0%
Recruitment/Marketing	0.7%	0.4%	58.8%
Accreditation/Professional Fees	1.8%	1.0%	96.2%
Administration (e.g., phone, postage, copying)	4.4%	2.0%	93.3%
Other Major Expenses	13.8%	11.0%	93.3%

#### **Tuition and Fees and Incidental Costs**

For students enrolled in responding PA programs in 2011, the average resident tuition was \$58,055, up 8.2% from last year, lower than the average annual increase of 8.8% (see Appendix II: Table B. "PA Student Expenses and Financial Aid, 1984-2011"). The average non-resident tuition was \$65,238, up 0.1% from 2010, but remained lower than the 8.2% average annual increase. Of particular interest was the difference between public and private institution tuition and fees (see Table 8). The average resident tuition was \$36,740 for public institutions and \$68,712 for private institutions. Public and private institutions did not differ greatly in their non-resident tuition cost, with an average nonresident tuition of \$62,985 and \$66,776 respectively.

"Incidental costs" refer to the total costs incurred by a student during the entire program, except for tuition, fees, and personal living expenses (e.g., transportation, food, housing, and expenses). Incidental costs included textbooks, diagnostic equipment, and required technology/software. The average total incidental costs per student for the entire professional phase was \$5,481, down slightly from the previous year's \$5,785. Public institutions (\$5,388) had a slightly lower average total incidental cost per student compared to private institutions (\$5,531).

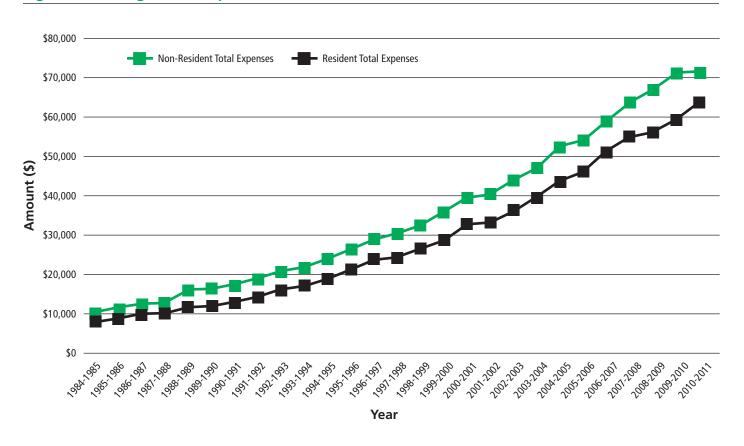

**Table 8. Tuition and Incidental Costs for Public and Private PA Programs** 

		PUBLIC			PRIVATE	
	Mean	Median	Standard Deviation	Mean	Median	Standard Deviation
Resident Tuition*	\$36,740	\$32,750	\$13,857	\$68,712	\$67,000	\$12,601
Nonresident Tuition**	\$62,985	\$65,000	\$19,894	\$66,776	\$65,485	\$14,155
Incidental Costs***	\$5,388	\$4,700	\$3,969	\$5,531	\$4,492	\$3,653

<sup>\*</sup>Public N = 42. Private N = 84. \*\*Public N = 43. Private N = 63. \*\*\*Public N = 47. Private N = 88.

Figure 6 shows that the average total expenses for PA students has steadily increased over time. Between 1984 and 2011, resident total expenses increased from \$7,669 to \$63,865, while non-resident total expenses increased from \$9,962 to \$71,130.

Figure 6. Average Total Expenses for PA Students, 1985–2011

Note: "Total expense" refers to the sum of tuition and incidental costs for students for the entire period of their training. Total scores, on which the averages were based, were tabulated only for programs that listed both incidental and tuition costs for 2010-2011. These numbers are not adjusted for inflation.

#### **Financial Aid**

On average, 90.5% of students in the most recently enrolled class received financial aid. Twenty-three responding programs (15.1%) reported all first-year students receiving financial aid.

# **Section 3. Program Personnel**

Overall, 154 programs provided complete or partial information on 1,789 program personnel — 1,334 faculty and 455 staff. On average, responding PA programs had 7.9 didactic faculty members (SD = 11.9), 3.7 clinical faculty members (SD = 18.1), and 3.2 staff members (SD = 2.4).

### **Student/Faculty Ratio**

The student/faculty ratio, calculated by the total number of enrollees (16,538) divided by the total number of faculty (1,334), was 12.4 for academic year 2010-2011.

### **Demographic Characteristics**

The average age of all faculty and staff members in 2010-2011 was 49.8 and 47.5 respectively (see Table 9). More than half of faculty members were female (57.2%), and most staff members were female (88.8%).

Table 9. Demographic Characteristics of PA Program Employees: Age and Gender

	AG	iΕ
	Faculty	Staff
Mean	49.8	47.5
Median	50.0	48.0

N	1,331	100%	455	100%	

Note: Faculty and staff with Pacific Island race and Other less than 5 were not represented.

#### **Professional Characteristics**

Faculty members have been in their current positions for an average of 5.6 years, as shown in Table 11. More than three-quarters (77.7%) of faculty members were PAs. The percentage of faculty who were tenured was 8.4%, and another 13.3% were on a tenure track. Just under half of faculty members (48.5%) were assistant professors, 21.9% were lecturers/instructors, 18.3% were associate professors, 3.4% were emeritus professors, and 2.6% were full professors. More than 60% of faculty members in the responding programs had a Master's degree as their highest degree, whereas 32.2% had a doctoral degree (including MDs). Among staff, 20% hold a Master's degree or higher.

**Table 11. Professional Characteristics of PA Program Employees** 

Years in Position	Faculty	Staff	Tenure Status	Faculty	Staff
Mean	5.6	14.2	On tenure track	13.3%	0.0%

#### **Salaries**

Table 12 presents descriptive statistics for staff and faculty salaries, as well as the mean and median FTE (full-time equivalent) for each group. Respondents were asked to report their actual salary in addition to their actual FTE. Salaries were then converted to 1.0 FTE and reported as such. The average salary for all staff was \$40,917, while the average faculty salary was \$90,285, with a median of \$85,000. Male faculty members had a higher average salary and a lower average FTE than their female counterparts. The average salary for male faculty members was \$95,368, with an average FTE of 82.1%, while the average salary for female faculty members was \$87,109, with an average FTE of 91.6%.

Table 12. PA Program Staff and Faculty Salaries by Gender and Ethnicity

	N	Mean	P10	P25	P50 (Median)	P75	P90	Mean FTE%	Median FTE%
Staff	238	\$40,917	\$25,000	\$30,290	\$36,689	\$45,279	\$60,900	97.1	100
Faculty									
All	673	\$90,285	\$70,000	\$76,802	\$85,000	\$98,000	\$117,716	87.8	100
Male	261	\$95,368	\$70,000	\$78,958	\$88,000	\$106,000	\$130,000	82.1	100
Female	408	\$87,109	\$69,166	\$75,000	\$84,496	\$93,380	\$107,811	91.6	100
White	517	\$90,173	\$70,000	\$77,000	\$85,263	\$98,363	\$116,000	90.2	100
Non-White	72	\$89,370	\$65,100	\$76,688	\$85,160	\$97,640	\$121,827	80.3	100

Note: Salaries were converted to 1.0 FTE.

The average faculty salary increased with age and years in position, as shown in Table 13. Faculty who were older than 60 years of age (\$98,553) or who worked 25+ years in their position (\$102,619) were paid the highest salaries on average.

Table 13. PA Program Faculty Salaries by Age and Years in Position

	N	Mean	P10	P25	P50 (Median)	P75	P90	Median FTE%
Age								
30-39	128	\$83,905	\$68,524	\$74,950	\$81,081	\$87,125	\$96,941	87.2
40-49	146	\$88,400	\$70,000	\$77,348	\$85,000	\$94,693	\$109,500	93.3
50-59	180	\$94,526	\$71,949	\$80,596	\$89,469	\$104,364	\$123,100	90.7

Years in Position								
Less than 1 Year	69	\$84,029	\$64,129	\$72,000	\$80,000	\$88,500	\$100,000	89.1
1-3 Years	244	\$86,126	\$68,054	\$75,000	\$83,510	\$90,960	\$104,700	90.2
4-7 Years	154	\$90,146	\$71,031	\$77,192	\$85,000	\$94,940	\$112,983	86.2
8-14 Years	135	\$96,786	\$76,357	\$82,888	\$91,998	\$106,168	\$123,600	88.1
15-24 Years	45	\$94,472	\$71,937	\$81,761	\$97,167	\$104,886	\$110,985	89.9
25+ Years	17	\$102,619	\$67,462	\$77,007	\$103,524	\$125,000	\$130,030	82.1

Note: Salaries were converted to 1.0 FTE, though the mean FTE does not reflect this. Salaries for ages less than 30 were not reported because there were only two cases.

Some faculty members hold multiple administrative roles. Table 14 reports faculty salary by their primary position only. On average, research coordinators were paid the lowest salaries (\$79,805) and department chairs were paid the highest salaries (\$117,538).

**Table 14. PA Program Faculty Salaries by Primary Position** 

	N	Mean	P10	P25	P50 (Median)	P75	P90	Median FTE%
Academic Coordinator	53	\$85,995	\$75,780	\$80,000	\$84,500	\$92,500	\$98,800	99.1
Admissions Director	10	\$82,668	\$71,734	\$73,326	\$84,993	\$89,000	\$95,284	95.0

Medical Director	125	\$111,378	\$69,565	\$87,963	\$104,545	\$122,030	\$143,814	77.2
Program Director	64	\$111,612	\$87,974	\$98,310	\$110,000	\$127,428	\$137,138	100.0
Research Coordinator	5	\$79,805	\$65,795	\$72,987	\$73,800	\$90,000	\$96,743	100.0

Note: Salaries for deans, associate deans, and division chiefs were not reported because there were only four cases.

Table 15 shows that PA faculty members were, on average, paid less (\$88,353) than those who were not PAs (\$98,835; these figures include medical directors). Tenured faculty had a higher average salary (\$105,365) than those on the tenure track (\$86,200), as well as those who were neither tenured nor on tenure track (\$89,077).

**Table 15. PA Program Faculty Salaries by PA and Tenure Status** 

	P50					Median	
N	Mean	P10	P25	(Median)	P75	P90	FTE%

Note: All salaries are converted to 1.0 FTE, though the mean FTE calculation doesn't reflect this.

In terms of academic rank, full professors earned the highest average salary at \$110,865, while associate professors and assistant professors had average salaries of \$100,702 and \$88,444 respectively (see Table 16). Lecturers/instructors earned \$80,487 on average. Faculty members with higher degrees were generally paid higher salaries.

Table 16. PA Program Faculty Salaries by Rank and Highest Degree Received

					P50			Median
	N	Mean	P10	P25	(Median)	P75	P90	FTE%
Academic Rank								
Professor	36	\$110,865	\$80,870	\$96,138	\$109,783	\$125,023	\$142,914	74.4
Associate Professor	125	\$100,702	\$73,289	\$84,491	\$97,850	\$113,319	\$135,000	91.8
Assistant Professor	348	\$88,444	\$70,000	\$76,463	\$85,000	\$93,257	\$106,802	91.9
Lecturer/Instructor	130	\$80,487	\$61,801	\$72,095	\$80,000	\$85,000	\$98,000	84.0
Highest Degree Rece	ived							
Doctoral	187	\$102,166	\$72,926	\$82,005	\$93,250	\$115,500	\$146,000	76.2
Master's	453	\$85,825	\$70,000	\$75,600	\$84,000	\$92,000	\$105,000	92.8
Baccalaureate	25	\$81,575	\$63,743	\$73,243	\$78,000	\$86,000	\$102,800	82.9

Note: Salaries were converted to 1.0 FTE, though the mean FTE does not reflect this.

#### **Clinical Work**

Sixty-three percent of faculty performed clinical work in the 2010-2011 academic year, for an average of 14.2 hours per week (SD = 11.8). For those reporting clinical income (N = 218), the average annual salary was \$28,626 (SD = \$36,034). The median salary was \$18,000. Among the faculty who worked clinically, 82% retained the income themselves (see Figure 7).

Figure 7. Clinical Income Disposal for PA Program Faculty

#### **Turnover**

On average, PA programs nationwide added more faculty members than they lost in the 2010-2011 academic year. Out of the 1,334 faculty members employed at responding PA programs in the 2010-2011 academic year, 6.7% ended their employment and 16.8% were hired during the same period. Likewise, out of the 455 staff members employed at responding PA programs in the 2010-2011 academic year, 7.0% of staff members terminated their employment, while 8.1% were hired.

Of the 6.7% of faculty members that ended their employment, the most common stated reason for leaving their program was a return to clinical practice (32%), followed by retirement (16%), and geographic relocation (14%) (see Figure 8).

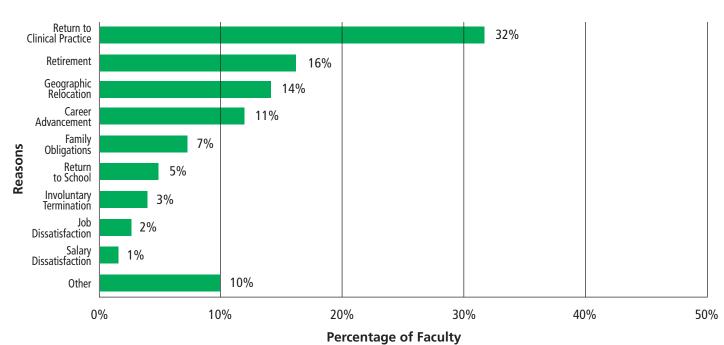

Figure 8. Reported Reasons for PA Faculty Leaving Programs

It took responding programs an average of 13 weeks (SD = 14.7, range 0-104 weeks) to find a new faculty member. On average, programs received four (SD = 3.1) qualified applications for a position. Most new faculty members (72.4%) worked in clinical practice before they became PA educators, while 14.5% worked in PA education.

#### **Tenure Track**

Sponsoring institutions were asked to select all of the faculty position classifications that were available for faculty in the 2010-2011 academic year. Of particular interest was the number of respondents who reported that their institutions offered only a tenure track, only a non-tenure track, or both tenure and non-tenure tracks. Of the 147 programs who responded to this question, 17% reported that they had only a tenure track available for faculty; tenure track includes clinical, academic, research, and other tenure tracks. About 31% of the programs reported that they had only a non-tenure track available for faculty; non-tenure track includes multi-year contracts, annual contracts, academic non-tenure track, and other non-tenure tracks. Lastly, 52% of programs reported having both tenure and non-tenure tracks available for faculty.

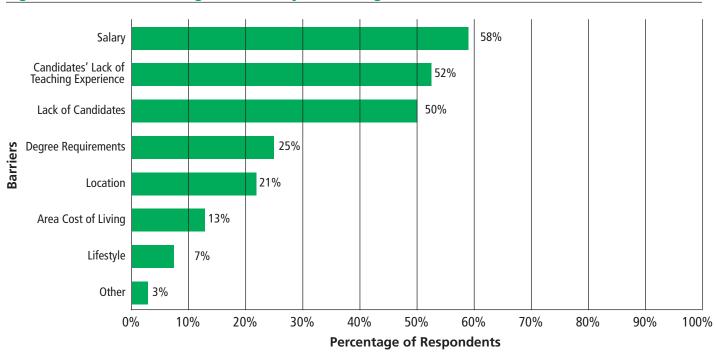

**Table 17. Tenure Tracks Available at Sponsoring Institutions** 

Type of Tenure Track	Number of Programs	Percent of Programs	
Only Tenure Track Available	25	17.0%	
Only Non-Tenure Track Available	46	31.3%	
Both Tenure and Non-Tenure Tracks Available	76	51.7%	
N	147	100%	

### **Barriers to Hiring New Faculty**

One hundred and forty-nine programs reported having encountered barriers of some kind to hiring new faculty. The most common barrier was salary (58%), followed by candidates' lack of teaching experience (52%), and lack of candidates (50%) (see Figure 9). Additional barriers included lifestyle, location, benefits package, attractiveness of clinical practice options, lack of problem-based learning experience, state budget cuts, and area cost of living.

Figure 9. Barriers to Hiring New Faculty at PA Programs

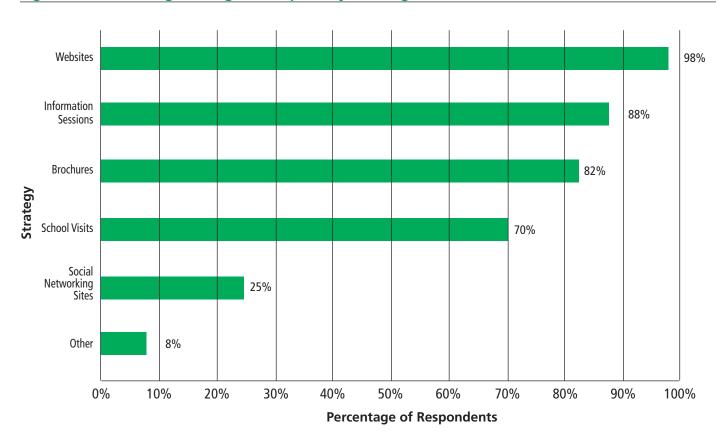

# **Section 4. Application And Admissions**

## **Recruiting Strategies**

One hundred and forty-eight PA programs reported student recruitment strategies. Virtually all PA programs used websites (98%) in their recruiting process, followed by information sessions (88%), brochures (82%), and school visits (70%) (see Figure 10). Other strategies reported included personal contacts, open houses, career fairs, social networking, recruiting sessions/forums, fact sheets, and "pipeline" strategies in collaboration with other organizations.

Figure 10. Recruiting Strategies Adopted by PA Programs

### **Degree Requirements**

Table 18 summarizes the degree requirements for admission related to the degree and credential awarded at program completion. Some programs offered more than one degree or credential.

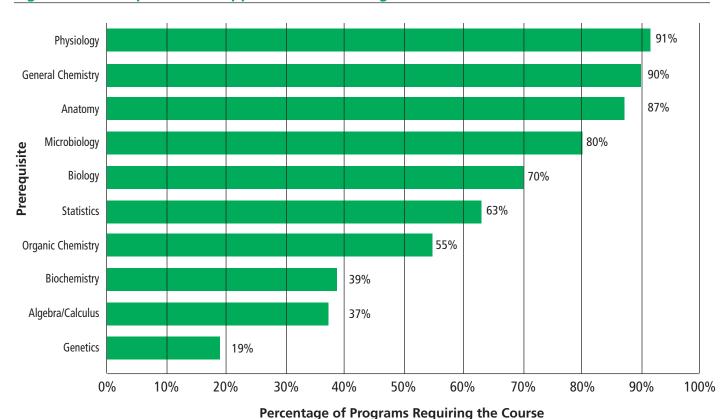

Table 18. PA Program Degree Requirements for Each Credential Awarded

CREDENTIAL AWARDED						
Requirement	Certificate	Associate's Degree	Baccalaureate Degree	Master's Degree		
Degree not required	35.0%	60.0%	78.3%	10.9%		
Certificate	0.0%	0.0%	0.0%	0.0%

N	20	10	23	137		

## **Prerequisites**

PA programs were asked to select prerequisite courses from a list of common science courses. Of the 148 programs that responded, physiology was required by 91%, followed by general chemistry (90%), anatomy (87%), microbiology (80%), and biology (70%) (see Figure 11). Algebra/calculus, biochemistry, and genetics were required by fewer than half of the programs.

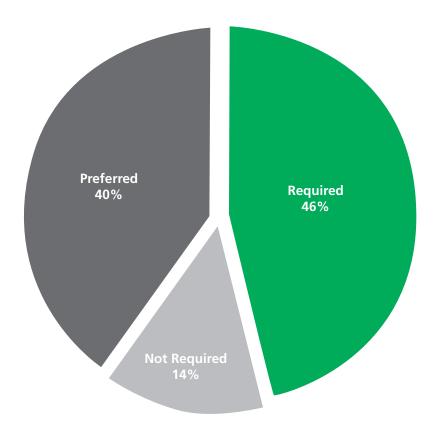

Figure 11. Prerequisites for Application to PA Programs

### **Health Care Experience Requirements**

Figure 12 shows that 46% of responding programs required their applicants to have prior health care experience (N = 68), while 14% did not require any health care experience (N = 20). The remaining 40% of programs "preferred," but did not require, their applicants to have prior health care experience (N = 59).

Figure 12. PA Program Health Care Experience Requirements for Applicants

## **Interview Requirement**

Admission interviews were required by 95.2% of responding PA programs. Only seven programs of the 147 responding programs (4.8%) did not require an interview for prospective PA students.

## **Section 5. Matriculants**

### **Enrollment and Capacity**

The average total enrollment of the 141 responding programs was 107.7, lower than the average capacity of 115.7 (see Table 19).

**Table 19. PA Program Enrollment and Capacity** 

		N	Mean	P10	P25	P50	P75	P90
All Years	Enrollment	141	107.7	49.0	68.0	105.0	132.0	180.0
	Capacity*	143	115.7	55.2	78.5	110.0	144.0	179.2
First-Year Class	Enrollment	140	45.9	24.9	31.0	40.5	55.0	74.1
	Capacity*	142	47.8	26.1	34.3	44.0	54.0	74.5
Second-Year Class	Enrollment	135	43.9	23.4	30.0	40.0	52.5	68.8
	Capacity*	138	47.0	25.0	34.0	41.0	52.8	70.0
Third-Year Class	Enrollment	72	39.4	20.3	29.0	35.0	48.0	61.9
	Capacity*	77	42.5	25.0	31.0	40.0	50.0	64.4

Note: \*Zero values were excluded from this analysis.

For first-year class enrollment, 50.6% of the responding programs filled exactly 100% of their capacity, up from 48.6% last year. Fifteen programs (9.4%) exceeded their capacity. On average, responding programs filled 96% of their first-year capacity.

Trends in total capacity and enrollment are shown in Figure 13. The percentage of unfilled seats has declined steadily over the years, even while the overall capacity has increased (see Appendix II: Table C. "Average Enrollment and Capacity for All Classes, 1984-2011").

Figure 13. PA Program Enrollment and Capacity, 1985–2011

#### Withdrawal and Deceleration

On average, 3.2% of students decelerated (median = 1.5%) and 2.6% of students withdrew or were dismissed (median = 1.8%) in any phase of the PA program. Table 20 shows percentages of withdrawal and deceleration among students. Percentages were calculated as number of students decelerated or withdrawn divided by the total number of students in all years.

#### **First-Year Class Enrollment**

A total of 6,422 new students were reported for the 140 responding programs. Total enrollment has increased significantly over the past four years moderated by increases in number of programs and increased capacity of existing programs (see Figure 14).

50 7000 Mean First-Year Enrollment Per Program Mean First Year Enrollment
 Total First Year Enrollment 45 6000 40 5000 30 4000 3000 2000 1000 AN THE STATE OF TH ,989:200° , SPA, OSTS , of the second , oper of , 881, 88° 200.2001 , SPOT SPOT Sept. Sept. Year

Figure 14. First-Year Class Enrollment at PA Programs, 1984–2011

#### First-Year Class - Gender

Percentages of male and female enrollees are shown in Table 20. Distribution of male and female enrollment of first-year students was similar to that of all class years. Female students made up more than 70% of total first year enrollees.

Table 20. First-Year PA Program Enrollment by Gender

		P50									
	N	Mean	P10	P25	(Median)	P75	P90				
Female	140	72.5%	57.5%	65.5%	74.1%	80.0%	85.7%				
Male	140	27.5%	14.3%	20.0%	25.9%	34.5%	42.5%				

The gender distribution of first-year students has started to stabilize after nearly a 20-year trend of a gradually increasing percentage of females (see Figure 15 and Appendix II, Table D "First-Year Gender and Ethnicity, 1983-2011").

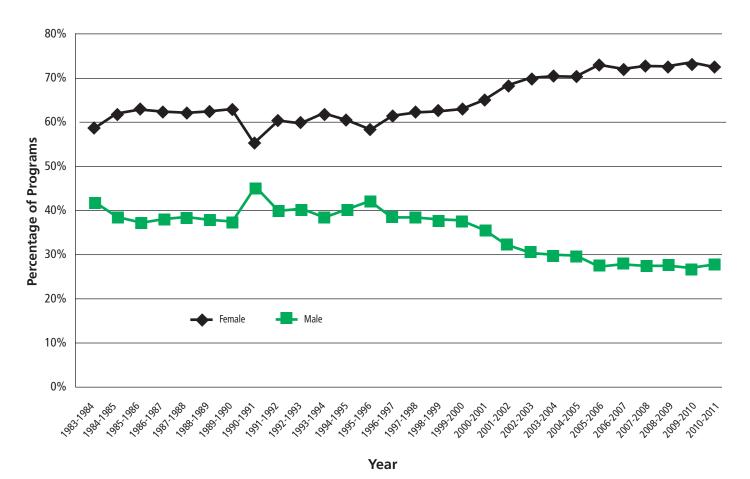

Figure 15. First-Year Enrollment at PA Programs by Gender, 1984–2011

## **Background Check and Mandatory Drug Testing**

Over three-quarters (77.7%) of responding programs (N = 101) reported that students were required to have a background check upon matriculation to the program, while 35.4% (N = 46) of responding programs mandated drug testing during the 2010-2011 academic year.

## CASPA First-Year Class – Race, Age, GPA, and Health Care Experience

For this next section, matriculant data are reported from member programs who participated in CASPA (Central Application Service for Physician Assistants; N = 121).

## **Race and Ethnicity**

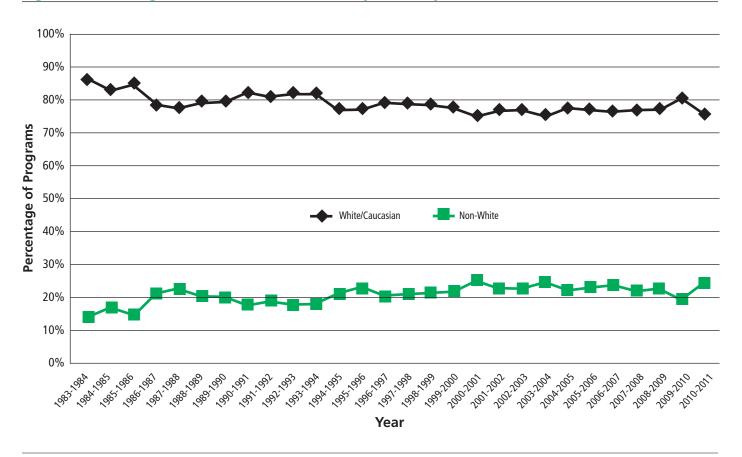

Table 21 shows the racial distribution of matriculants. The majority of matriculants were white (75.9%) or Asian (19.1%). Additionally, 13% of matriculants were Hispanic.

Table 21. Race and Ethnicity of Matriculating Students from CASPA Programs

	Number of Matriculants	% of Matriculants	
Race			
White	3,749	75.9%	
Black or African-American	166	3.4%	
Asian	946	19.1%	
Native Hawaiian or Pacific Islande	er 20	0.4%	
American Indian or Alaskan Nativ	/e 60	1.2%	
N	4,941	100%	
Ethnicity			
Hispanic	606	13.0%	
Non-Hispanic	4,058	87.0%	
N	4,664	100%	

Figure 16 shows the trend of racial distribution for first-year students. The percentage of non-white matriculants rose to 24% this year while the percentage of white matriculants dropped to 76%. Note: 2010–2011 data reflect data from only CASPA participating programs.

Figure 16. PA Program First-Year Enrollment by Ethnicity (White/Non-White), 1984–2011

#### Age

The average age for first-year enrollees in CASPA programs during 2010-2011 was 26.1 years (median = 24, SD = 5.7, N = 4,715), a minimal difference from the past two years.

### **Grade Point Averages**

Grade point averages (GPAs) of matriculants to CASPA-participating PA programs are detailed in Table 22. The average undergraduate GPA was 3.49, which is higher than last year (mean = 3.45). The average undergraduate science GPA (mean = 3.43) was lower than the average undergraduate non-science GPA (mean = 3.56).

Table 22. Grade Point Averages of Matriculating Students from CASPA Programs

				P50		
N	Mean	P10	P25	(Median)	P75	P90
4,715	3.43	3.02	3.21	3.44	3.68	3.87
4,715	3.56	3.14	3.39	3.62	3.81	3.92
4,715	3.49	3.12	3.31	3.52	3.71	3.86
	4,715 4,715	4,715     3.43       4,715     3.56	4,715       3.43       3.02         4,715       3.56       3.14	4,715       3.43       3.02       3.21         4,715       3.56       3.14       3.39	N         Mean         P10         P25         (Median)           4,715         3.43         3.02         3.21         3.44           4,715         3.56         3.14         3.39         3.62	N         Mean         P10         P25         (Median)         P75           4,715         3.43         3.02         3.21         3.44         3.68           4,715         3.56         3.14         3.39         3.62         3.81

## **Health Care Experience**

Table 23 details the health care experience of matriculants from CASPA programs (see also Appendix II: Table E. "Health Care Experience of PA Program Entering Classes, 1984-2011"). The majority of matriculants reported accruing health care experience in the following categories: other work experience (mean = 4,264), patient contact experience (mean = 3,350), and other health care experience (mean = 1,830). It is interesting to note that, on average, matriculants reported accruing more health care experience hours from research (mean = 1,140) than health care shadowing (mean = 151) or community service (mean = 710).

Table 23. Average Health Care Experience Hours of Matriculating Students from CASPA Programs

	N	Mean	P10	P25	P50 (Median)	P75	P90
Patient Contact Experience	4,060	3,350.0	140.0	446.5	1,355.0	3,620.0	8,476.8
Other Work Experience	3,132	4,263.8	339.3	920.0	2,188.5	5,040.0	10,052.0
Other Health Care Experience	2,353	1,829.5	44.0	112.0	450.0	1,800.0	4,470.0
Community Service	3,470	710.0	35.0	84.0	210.0	540.5	1,338.7
Health Care Shadowing	3,765	151.1	15.0	30.0	65.0	145.0	302.0
Research	1,657	1,139.6	47.8	104.5	320.0	999.5	2,968.0
Total Health Care Hours	4,701	7,696.5	975.0	2,180.0	4,758.0	9,630.0	17,393.6

Figure 17 details the change in average total health care experience hours accrued by PA program matriculants over time. Much of the fluctuation is due to changes in what programs and/or CASPA count as health care hours (e.g., research experience).

12,000 9156 10,000 9504 9328 9159 9152 8624 8800 8448 7744 8,000 7920 8096 7920 7568 7697 7920 7040 Hours 7568 6688 6336 6160 6.000 5632 5481 5280 4376 4,000 2,000 ,98<sup>1</sup>,98° 1880 1.08h 1.08h 1801.85 1897.1893 1033,109A 1885 1887 ,891.188° 1086,08g

Figure 17. Total Health Care Experience Hours Accrued by PA Program Matriculants, 1984–2011

Note: 2010-2011 CASPA Matriculant Average Health Care Experience (self-reported). Health care experience hours include patient contact experience, other work experience, other health care experience, community service, health care shadowing, and research. Previously, health care experience hours included direct patient care, community service, health-related experience, and observation/ shadowing. The change in the classification of health care experience hours was the likely cause of the jump in total hours in 2010-2011.

# **Section 6. Class Profiles And Graduates**

Programs were asked to provide information for all of their class of 2011, including those who were decelerated, withdrawn, or graduated.

#### The Class

The class (often described as a cohort) was defined as all students who entered into the PA program expecting to graduate on time in 2011, regardless of their eventual graduation status. This includes those who graduated, withdrew, and decelerated. The average 2011 class had 42.5 graduates (SD = 18.4) (see Table 24). Percentages of students withdrawn and decelerated were calculated as number of students withdrawn or decelerated divided by the total number of graduating students.

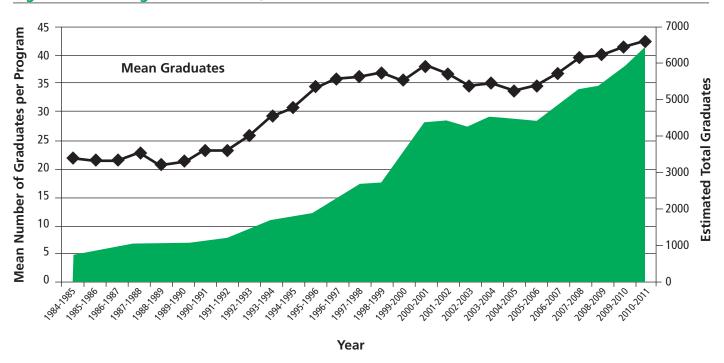

Table 24. Graduated, Withdrawn, and Decelerated Students at PA Programs

	Total Programs	Total Students	Mean	Median
Graduated	128	5,436	42.5	39.0
Withdrawn	128	248	1.9	1.0
Decelerated	128	205	1.6	1.0
Total	128	5,889	46.0	42.0

#### 2011 Graduates

There were approximately 5,889 graduates from responding programs in 2011. Considering the average graduate class size of 42.5, a more realistic estimate of the national output of physician assistants would be 6,545 (42.5 graduates x 154 programs that had students enrolled). Figure 18 shows the average number of graduates per program (left axis) and the cumulative total of PA graduates (right axis) since 1984.

Figure 18. PA Program Graduates, 1985-2011

## **Gender and Ethnicity**

The average percentage of male students who withdrew (7.6%) was higher than female students (4.5%) (see Table 25). The percentage of decelerated male students (6.0%) was also higher than that of their female counterparts (3.8%). The average graduation rate for PA students was 92.3%. Female PA students had a higher graduation rate (93.0%) than male PA students (90.1%).

Table 25. Percentages of PA Students Withdrawn or Decelerated, by Gender

		<b>Total Programs</b>	<b>Total Students</b>	Mean	%Total
Female	Graduated	128	4,083	31.9	93.0%
	Withdrawn	106	165	1.6	4.5%
	Decelerated	105	137	1.3	3.8%
Male	Graduated	128	1,353	10.6	90.1%
	Withdrawn	95	83	0.9	7.6%
	Decelerated	92	68	0.7	6.0%

Out of the 5,889 graduating students (includes graduated, withdrawn, and decelerated), 120 schools provided race data for 5,017 students (see Table 26). Eighty-six percent of these students were white, 6.5% were Asian, and 4.7% were black. Additionally, 106 schools provided ethnicity data for 4,476 students. Eight percent of the graduating students were Hispanic.

Table 26. Race and Ethnicity of 2011 Graduating Class

	N (Programs)	N (Students)	% of Total	
White	118	4,315	86.0%	
Black	89	235	4.7%	
Asian	94	327	6.5%	
Other Asian	33	78	1.6%	
American Indian or Alaskan Nat	ive 29	51	1.0%	
Hawaiian	11	11	0.2%	
Total	120	5,017	100%	
Hispanic	90	353	7.9%	
Non-Hispanic	96	4,123	92.1%	
Total	106	4,476	100%	

As shown in Table 27, American Indian or Alaskan Native PA students had the highest graduation rate (96.7%), followed by White students (94.1%), and Asian students (91.7%). Hispanic students had a slightly higher graduation rate (94.4%) than Non-Hispanic students (93.1%).

Table 27. Graduation Rates by Race/Ethnicity for 2011 Graduating Class

	Total	White	Black	Asian	Other Asian	American Indian or Alaskan Native	Non-Hispanic	Hispanic
Mean	92.3	94.1%	90.5%	91.7%	90.0%	96.7%	93.1%	94.4%
Median	93.0	95.3%	100%	100%	100%	100%	95.2%	100%
N	128	118	75	89	31	25	96	82

#### Reasons for Withdrawal/Dismissal

For the 92 programs responding, the most common (61%) reason for student withdrawal was related to academics (see Figure 19).

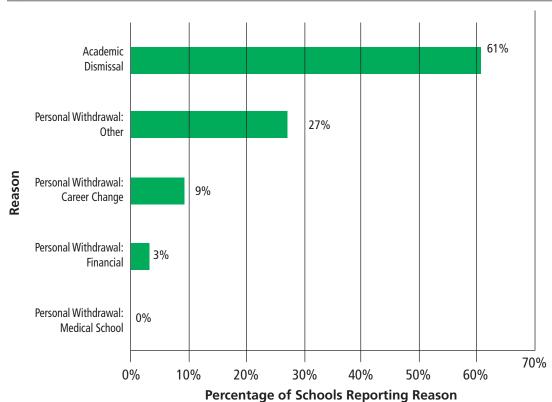

Figure 19. Reasons for Withdrawal or Dismissal of PA Students

# **Specialty Choices of 2010 Graduates**

Among the 2010 graduates at programs that reported, 40% were employed in primary care specialties and 60% were employed in non-primary care specialties (see Table 28).

**Table 28. Primary Care vs. Non-Primary Care Specialty Choices of 2010 PA Program Graduates** 

	N	%	
Primary Care Specialties	1,501	40.0%	
Non-Primary Care Specialties	2,254	60.0%	
N	3,755	100%	

#### **Starting Salary of 2010 Graduates**

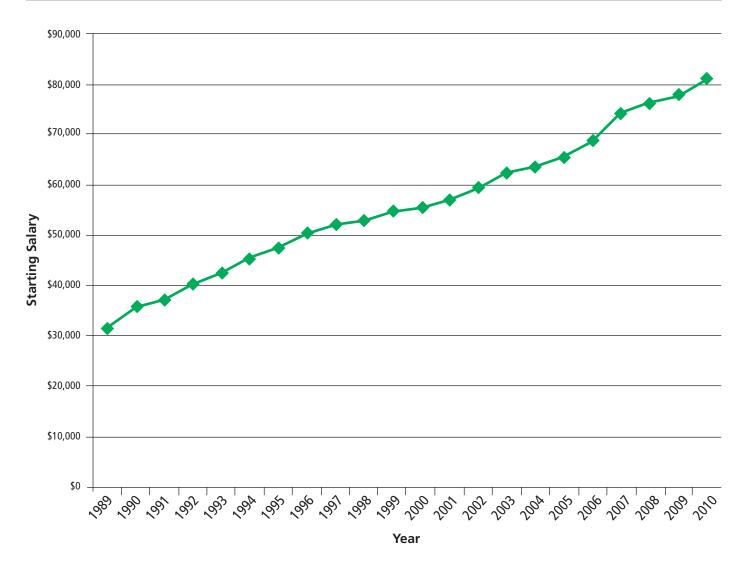

Programs were asked to provide the average starting salary of their 2010 graduates. The average salary by program of the 2010 graduates was \$80,683 (see Table 29).

**Table 29. Starting Salary of Recent PA Graduates** 

		P50							
	N	Mean	P10	P25	(Median)	P75	P90		
Starting Salary	42	\$80,683	\$74,280	\$78,015	\$80,604	\$82,409	\$88,675		

The trend line of PA graduate salaries is shown in Figure 20. Since 1989, the average annual increase has been 5%.

Figure 20. PA Program Graduates' Starting Salary, 1989–2010
